As Good As It Gets....

Your international legal choice

© Ms. Attorney Vera Mueller

Today we appreciate to introduce you to Ms. Attorney Vera Mueller leading a young and innovative international law firm in FL. Ms Attorney Mueller provides her offices in Germany (Berlin) and her US office in Florida (Miami) and mainly practices in international legal cases. The law firm stands for an absolute peculiarity as the clients looking for legal help in internationally connected cases between the US and Germany find it both here out of court and for judicial proceedings. We had the opportunity to meet Ms. Mueller personally for an interview in her location in Miami and took the chance to ask her a few questions ...

(InFlorida) Ms. Mueller, you have decided on a very unusual path when you opened another office in Florida in addition to your law practice in Germany in order to be active in international proceedings linked between US and Germany Tell us a little bit about yourself. What was your inspiration for that?

(Att. Ms.Mueller) Thank you for your visit, happy to see you here again! Actually I get asked that question very often! There was no concrete single inspiration, on the contrary, I was interested in many things from the start, both in terms of my profession and the different branches of law practice as well as my private life which is also very diverse. I also love the United States in every angle – so it was clear to me that very shortly after founding my law firm in Berlin I would extend to the US for the future and also stay there.

(InFlorida) It sounds as if you have planned your private and professional life very focused that you can practice both in beautiful Florida and enjoy private life at the same time ...

(Att.Ms.Mueller) Absolutely, that's how it is, I love to work here and do business, have international clients and on the other hand, to constantly develop myself, to live and enjoy it here. That is for me as well what the US are about - you work hard and inspired and enjoy your personal dream. For me here is absolute paradise to combine the best of everything.

(InFlorida) Great said! If you can recover privately from your work - which legal proceedings or cases are, above all, on your work desk right now? Did the current Corona-pandemic change anything in legal practice?

(Att.Ms.Mueller) This is very versatile, we are mainly active in international private law, criminal law, real estate and property law, labour law and as a major focus of mine on international family law. This area is very diverse and exquisite, always challenging and individual and, above all, very interesting to me. The current situation did not change in general, you see even more problems in every aspect of life of people now and cases get also more emotional in any aspect but overall, there is no specific change as we are always occupied and confronted by lots of different situations.

(InFlorida) That sounds very interesting. As we can see there is a lot of additional work and effort put into your law office to represent and defend international cases. Can you tell us a little about your focus in international family law? What is it about? Just to have a shortly overview for our readers...

(Att.Ms.Mueller) Yes sure. Our clients come to us especially in complicated custody disputes across national borders, contact and visitation orders, juridical disputes, international divorces and following orders (mostly with reference to Germany), but increasingly and especially in this Corona pandemic year also due to international child abductions and kidnapping which unfortunately increased again. So the variety is very complex. We are happy to clarify all legal information of the individual case as part of the initial consultation so that we can definitely go into detail and initiate the best legal steps for our clients.

(InFlorida) Thank you for this brief introduction Ms. Attorney Mueller! Interested readers are welcome to find out more on the firm's website and find all other contact details and information there. We wish you all the best for your future and best of health in these times!

(Att.Ms.Mueller) Thank you for the interview and have a great day, stay safe!
